

Important Memo Q4

To: Mr. Wheeler's Technology Courses including...

- *World of Technology periods 1 and 8*
- *Architectural Drawing period 3*
- *Computer Aided design period 5e*
- *Principles of Engineering period 6L*
- *Technical Writing period 7*

From: Daniel Wheeler

As we move through this uncharted territory and will now start Quarter 4, there will be some changes to how things move forward in Wheeler's technology courses.

Since we don't have access to our shop and our CAD lab and other resources I will be using schoology to communicate design and writing work. Expect important Microsoft word documents, PowerPoints, web links and other resources posted to schoology to download or view.

PLEASE LOGIN TO SCHOOLGY on the following days to check updates.

- Monday
- Wednesday
- Friday

I expect all students to check their course or courses if enrolled in more than one to do the required work. *Grades will now update weekly in q4.*

Please utilize my school email at (below) for direct communication.

dwheeler@midlakes.org

What If you are currently working on a design project that we have already discussed? Please continue your weekly updates. **Be aware** since we are moving into a new quarter that you must communicate with me to discuss a quarter 4 independent project. **All students**, please follow the expectations and keep the hope that we will be back together soon; however anticipate a long haul until we return.

Wheeler, Daniel
